About Koligo Therapeutics

Koligo Therapeutics, Inc. (“Koligo”) is a US regenerative medicine company developing and commercializing a range of tissue therapies for unmet medical needs. Koligo is unique in that, unlike most biotechnology companies, it has a product that is qualified for sale in the United States. Its first product Kyslecel® is an autologous pancreatic islet cell therapy used to treat chronic or recurrent acute pancreatitis, a debilitating and painful condition with few effective treatment options. Koligo commenced sales of Kyslecel® in November 2017. Short-term, Koligo is working on expanding its sales to a larger number of hospitals throughout the United States. Long-term, Koligo is developing a range of cell therapies, three-dimensional (3D) bioprinted tissue, and other regenerative medicine products.

Job Summary:

The Product Specialist assists in the production of Koligo’s main product, Kyslecel®. In this role, the individual will be involved in all aspects of Kyslecel® production including preparation of the cleanroom, preparation of reagents, and participation in the processing of human tissue to produce the final product.

Job Duties:

- Complete and maintain training in all standard operating procedures necessary to produce the Kyslecel® product
- Maintain an inventory of necessary reagents, supplies and equipment
- Participate in the preparation of Kyslecel® in a cleanroom while maintaining sterile conditions
- Prepare and complete all paperwork, including Batch Production Records associated with each production run
- This position will report to the Laboratory Director

Essential Qualifications:

- Master’s degree and 1 year of biologic product manufacturing OR
- Bachelor’s degree and 3 years of biologic product manufacturing OR
- Associates degree and 5 years of biologic product manufacturing
- Excellent interpersonal skills; builds effective interactions with a broad range of internal and external organizations, teams, and individuals
- Excellent verbal and written communication skills
- Ability to think critically and takes collaborative approach to problem solving
- Ability to work effectively in regulated and fast paced environment
- Demonstrates high level of professional integrity and trustworthiness with strong work ethics

The ideal candidate would possess:

- Extensive working knowledge of cGMP/cGTP regulations
- Direct working experience in the field of cell and tissue therapy preferred
- Direct working experience in a cleanroom environment
